

FARMGOD

Pricing: Public Cloud and Private VPS

AT A GLANCE

One Platform, Two Ways to Run It

FARMGOD monitors and manages your ASIC miners: the whole fleet on one page, every miner down to its boards and chips, and the actions to run it from wherever you are.

What This Sheet Is For

FARMGOD comes in two ways, and this sheet shows what each one includes and costs. **FARMGOD Cloud** is the self-service offering: sign up, connect your miners, start for free. A **Private VPS** is your own FARMGOD server, set up and kept current by us, with every feature included.

	FARMGOD Cloud	Private VPS
For	Self-service, from your first miner	Commercial operations
Runs on	FARMGOD's shared service	Your own server, at your own address
Starts at	Free for up to 5 miners	\$19.99 a month plus \$0.36 per ASIC
Features	Cloud FREE, or all of them with Cloud PRO	All included
You pay for	Miners that reported in the last 7 days	The month's average of ASICs online
Contract	None: month by month, cancel anytime	No long-term contract, cancel anytime

MINING AS A BUSINESS

The Private VPS is the way to go: your own server with everything included, accounts for your team and your hosting customers, and a lower price per miner than Cloud as the fleet grows.

PUBLIC CLOUD

FARMGOD Cloud

Ready in minutes and free to start. No server to run: a spare PC or a USB stick with FARMGOD.OS connects your miners to your account. No spare PC? A preconfigured FARMGOD.OS box is available, price on request.

Plans

Plan	Per month	What you get
Cloud FREE	\$0 up to 5 miners	The complete monitoring, no time limit. Reboot your miners and read their logs.
Cloud PRO	\$9.99 first 15 miners included	Everything: every miner action, pool management, Telegram notifications, more than one location, Automation, Curtailment, AI Audit and the Sitemap. Each further miner as in the table below.

More than 5 miners? A 7-day PRO trial starts by itself, with every feature, so you can try FARMGOD with your whole fleet before you subscribe. No card needed until then.

Cloud PRO: Each Further Miner

Miners	Per miner and month
1 to 15	included
16 to 25	\$0.58
26 to 50	\$0.54
51 to 100	\$0.50
101 to 200	\$0.46
201 and more	\$0.42

What a Fleet Pays per Month

Miners	Cloud PRO
up to 5	free
15	\$9.99
25	\$15.79
50	\$29.29
100	\$54.29
300	\$142.29

Each miner is priced by the range it falls in, so the price per miner goes down as your fleet grows. You pay month by month, by card, with no long-term contract, and can cancel anytime; the first month only for the days that are left of it. Only miners that reported within the last 7 days count, not every miner you ever added. Prices in US dollars, plus tax where it applies.

PRIVATE VPS

Your Own FARMGOD Server

For commercial operations: a server of your own at your own address, set up and kept current by FARMGOD, with everything included.

Price

	Per month	ASICs	At \$0.36	At \$0.21
Server fee	\$19.99	300	\$127.99	\$82.99
Each ASIC	\$0.36	1,000	\$379.99	\$229.99
Each ASIC while Bitcoin is under \$100,000	\$0.21	5,000	\$1,819.99	\$1,069.99

The server fee covers your server, its setup, updates, snapshots, automated backups and system monitoring; the price per ASIC covers every feature. The reduced rate applies while Bitcoin is under \$100,000: see the agreement. You are billed for the month's average of ASICs online, not for every ASIC onboarded. Pay by ACH, wire, crypto or card. Prices in US dollars, plus tax where it applies.

What It Adds to Cloud

Everything included

Every feature of Cloud PRO from the first ASIC, with no plans to choose from and no miner limit to watch.

Your own server

Your fleet's data on a server that is only yours, on encrypted storage, at your own address.

Your team

Accounts for your people, each with the permissions you give them.

Your hosting customers

Accounts for the customers whose miners you host: they see their own miners, with prepayment and invoices.

Cloud and Private VPS Compared

Feature	Cloud	Private VPS
Live monitoring: fleet, Device-Sets, every miner down to boards and chips	✓	✓
FARMGOD.OS for a spare PC: from a USB stick or installed	✓	✓
Reboot miners, read their logs	✓	✓
All miner actions: power modes, sleep and wake, pools, passwords	PRO	✓
Pool management, Telegram notifications, more than one location	PRO	✓
Automation, Curtailment and AI Audit	PRO	✓
Sitemap: every miner where it stands, mapped on site with your phone	PRO	✓
Accounts and permissions for your team	×	✓
Accounts, prepayment and invoices for hosting customers	×	✓
AI support assistant in your Telegram group	×	✓
Your own server, address and encrypted storage	×	✓
Dedicated resources, upgraded as your fleet grows	×	✓
Your own backups, restorable for your server alone	×	✓
Server snapshots	×	✓
Data retention set to your needs	×	✓

✓ included · **PRO** with Cloud PRO and during its trial · × not available
